

Rolo platna – UZORCI

MEGALUX

Platno EKO je 100% ekološki proizvod, pri njegovoj izradi maksimalno se vodi računa o zaštiti životne sredine.

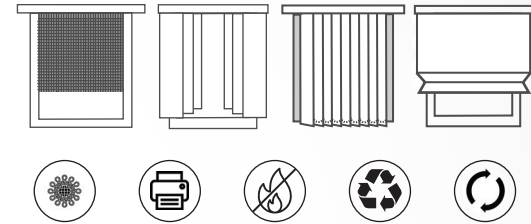

Pravilno odabrana zaštita od Sunca može da ograniči efekte sunčeve toplote, čime se smanjuju operativni troškovi klimatizacije.

Rolo platna blokiraju toplotu i sprečavaju zagrevanje stakla, ali i zadžavaju temperaturu prosorije.

Mega Lux Vam nudi širok asortiman boja i dezena, spoj elegancije i efikasnosti, sa pažljivo izabranim pigmentom materijala koji garantuje postojanost boje.
